

PROPOSALS:

1. Conduction of competitions which are less resource intensive
2. Helping you explore your hidden fine art talents
3. Producing and recording music albums

1. Conduction of competitions and events which are less resource intensive

I will ensure the smooth conduction of competitions currently through online but also offline in the coming future. It will my responsibility that every event is fair for each and every participating individual and lack of resources should not hinder the hopes and dreams for any student at home. This will be achieved by conducting more events which are less resource intensive and those which do require more resources shall be sufficed with smartphones and laptops for sure.

2. Helping you explore your hidden fine art talents

Many of us have not yet explored ourselves beyond academics which is why I am planning to help each one of you to remove your hesitation and express yourself through fine arts. You have hidden talents; all you need is medium to express it and I will provide you with that.

3. Producing and recording music albums

With the fine arts and music industry on a rise it would be foolish to miss the opportunity to produce music albums. Not just recreating music that has been already released but composing our own songs after gathering the best in the campus to display to the world what IIT KGP is capable of. With recording and stage experience as a drummer in the past I know I have what it takes to achieve this.
