Roll number- 19MT10007

Department of Metallurgical and Materials Engineering

REVISED PROPOSALS

Proposals

Proposal 1

- Developing an online Inventory system

Aim:

To digitize the inventory system to maintain the record about the current status of the equipment and the purchase done in the academic year

Plan of action:

- All the transactions which will be done to purchase any pieces of equipment for any sports would be recorded in a digital inventory. This will ensure that the data will be preserved for any future reference and validation.
- The concerned secretary will update the logs of equipment borrowed, lost/broken, and in the stock on a weekly/monthly basis.
- The data will be cross verified with the purchase logs every 6 months by the General Secretary. If any discrepancy is found, the matter will be brought to the Executive Council.
- The data will be available on the Gymkhana website which could only be accessed by the Gymkhana officials.

Benefits:

- The proposal would ensure transparency in the purchase and maintenance of the equipment.
- It would also lead to optimal usage of resources, thus getting the best out of the investments.
- The digitized inventory would streamline the whole process of selecting and buying the equipment thus saving a lot of time.

Proposal 2

- Sports guidance program

Aim:

To keep the students engaged in sports and games.

Current Scenario:

- Students, in large numbers, come for the NSO Trials, but gradually, during the course of a semester, the level of enthusiasm drops among the students resulting in NSO sessions becoming more of a burden which affects the conversion in Inter IIT.

Plan of action:

- When the students have been given their respected sports, a weekend will be chosen for the guide allotment session.
- A student is eligible to be a guide if he has a minimum of 2 years of academic experience.
Also, the guide will be chosen by the concerned PTI and the team captain.
- **Particulars of the session:**
The concerned secretary, will have to do the allotment of the students to the guide based on the given preference in the decreasing order- sports events, hall in NSO Sports.
- Each guide will be allotted not more than 6 students.
- The guides will get a certificate from Technology Students' Gymkhana.

Benefits:

- The senior students are the most experienced ones and they know the importance of sports in life. They will guide the students whenever possible and keep them motivated. Practicing with a better player always motivates you to do better.
- Sports like Badminton, Lawn Tennis, Squash, Table Tennis you always need an experienced player who could help you in your training session. This initiative will cater to the needs of the students who are new to sports and want to follow it.

- These guides can provide them with all kinds of help and will motivate them to keep coming for the practice sessions and a step further for inter IIT practice. The guide can also help the players during any injuries and can help them achieve faster recovery.

Proposal 3

- Revamping selection flow for NSO Sports to create a more transparent and efficient selection process in an online semester as well as an offline semester.

Aim: Provide the opportunity to the students to be a part of their preferred sports.

Current Scenario:

- Students have been allocated NSO with the certificate which they provided on ERP during their registration. This has made the process very random and unfair. Despite being very interested in a particular sport, a student cannot be a part of it due to a lack of prior experience.
- Students who come to the institute do not have any prior exposure to the sports, their achievements, or their culture, factors that bind the student to a particular sport.
- During an offline semester, those students who had prior knowledge or played a particular sport will get through the selection process. The students who are interested to be the part but due to lack of practice could not perform better in the trials.

Plan of action:

Online:

- An introductory seminar for sports will be conducted. The concerned PTI and the seniors of that sport will be part of the session. The main goal will be to get the students aware of their achievements and how they function during the normal times in this seminar.
- The concerned PTIs can make videos of their respective grounds showing the students about the facilities provided.

- After the conclusion of the seminar, the students will have the chance to explore any sports of their like and train with the concerned PTI for a month.
- Then the selection process will happen. The students who are interested in a particular sport will have to perform specific exercises or drills given by the concerned PTI and send their videos to the concerned secretary.
- The secretary has to compile the videos and send them to the concerned PTI.
- The concerned PTI will then select the individual.
- The certificates will still play a vital role in selection if the student faces any difficulties in the process.

Offline:

- All the grounds will be open for the players who want to be a part of any particular sport for a month.
- The players can practice under the PTI for that duration of time. Since there will not be any rigorous Inter IIT practice at the starting of the semester, the players can train efficiently. If any overcrowding incident happens then slots will be provided for the practice sessions.
- After their month-long training, the players will be asked to give the NSO trials and then the players will be selected.

Benefits:

- Since NSO is an accredited course, this initiative will allow the students to get engaged with the sports they like the most and want to play.
- It will also help to identify the student's potential, and the PTIs can work upon it to synthesize workouts specific to them as they are an asset to the team in the coming years.
- This process provides a better opportunity for the students, as most of the students are involved in an intense study to clear JEE(A), and hence due to lack of time, generally don't indulge in physical activities.
- The player will get to learn the sport in which he wants to get involved and then the trials will be much more equal.

Proposal 4

- Scholarship Program for the students who are performing exceptionally well in their sports.

Aim :

To reward the players for their hard work and dedication to our institute.

Current Scenario:

- Students who are performing well in their respective sports are demotivated due to a lack of financial support. They are unable to even take necessary supplements to improve their physical fitness.
- Many students cannot afford the equipment (shoes, studs, other gears, etc) which is sturdier. These gears often protect oneself from unwanted injuries.

Plan of action:

- Every year the PTIs of the respective sports will bring forth the performance report of the player in front of the Students' Council.
- The report will be then evaluated by the Students' Council based on his performance of the previous year. As follows:

Individual events:

☐ Athletics, Swimming:

→ The player in inter hall(Senior category) wins:

- Gold -5
- Silver -3
- Bronze -2
- Fourth position -1
- Individual award -10

→ The player in Inter IIT wins:

- Gold -10
- Silver -6
- Bronze -4
- Fourth- 2
- Individual award -20

→ If the player wins any medal at the national or state level competition:

- He will be provided with the stipend.

☐ **Weightlifting:**

→ The player in inter hall wins:

- Gold - 5
- Silver -3
- Bronze- 2
- Fourth- 1
- Individual award -10

→ The player in Inter IIT wins:

- Gold -10
- Silver -6
- Bronze -4
- Fourth -2
- Individual award -20

Team sports:

● Selection Criteria:

- ❖ The players will get points for their achievements. Based on these points it will be decided whom to award the scholarship.

Calculating score:

→ Player part of the hall team wins:

- Gold - 5
- Silver -3
- Bronze- 2
- Fourth- 1
- Individual award(Tournament) -10

→ Player part of Inter IIT team wins:

- Gold -10
- Silver -6
- Bronze -4
- Fourth- 2
- Individual award(Tournament) -20

According to this metric, the score of the players will be calculated, and based on that players will be considered for the stipend.

If there is any tie between the candidates and the number goes above 25 then the total amount will be equally shared among the students.

The minimum points* required to be eligible for this stipend will be :

Team sport - 19

Individual sport - 25

(* These threshold will be used when both inter hall and inter IIT is conducted in an academic session. Else a different threshold will be set according to the requirement.)

- The General Secretary will then present a list of students to the Executive Council for further approval.
- The stipend to the players will be provided at the end of the academic session based on their performance of that academic session.

Budget: The maximum number of students who will get the stipend will be fixed to 25. If the number is increasing then the total amount will be equally distributed among the players.

$$25 \times 10000 = \text{INR } 2,50,000 \text{ /year}$$

Benefits:

- This initiative will cater to the needs of the sportsperson.
- Rewarding the deserving players in this manner will boost up the morale of the players. Also, the student fraternity would in general gain more enthusiasm because of the motivation that they will get from this program.
- The players will feel appreciated and privileged. I believe this is the least we could do for their hard work and dedication to bring laurels to the institute.
